TMR Feature Code Library

TMR Feature Codes (V2.6).FXL

December 2021

UPG

Contents

Revisions:	Release Date:	Changes:
TMR Feature Codes (V2.2) (First release)	1/8/2020	N/A
TMR Feature Codes (V2.3)	30/10/2020	Added Date & Time Attribute and Groups for field use
TMR Feature Codes (V2.4)	30/06/2021	Updated Utilities attributes. Changed Diameter mm to m.
TMR Feature Codes (V2.5)	21/09/2021	Added 'Surveyed' to Location Type attribute for utilities
TMR Feature Codes (V2.6)	2/12/2021	Changed the Layer names to Upper Case

Introduction

This guide looks at the details included in the TMR Feature code library put together by UPG. This library has been designed to match as closely as possible to the current feature library outlined by TMR.

This contains the feature codes which have been mapped with the line styles and symbols as defined in their guide. This has been built against the current TMR updates for February 2016 schema online.

The line feature points once processed in TBC will all end up on Layer "0".

The code of the linestrings has been placed in front of the string name to allow mapping in 12D.

Control Codes

Control codes have been included in this library for enhancing field pickup if desired and allowing for greater editing in TBC through the use of editing feature codes.
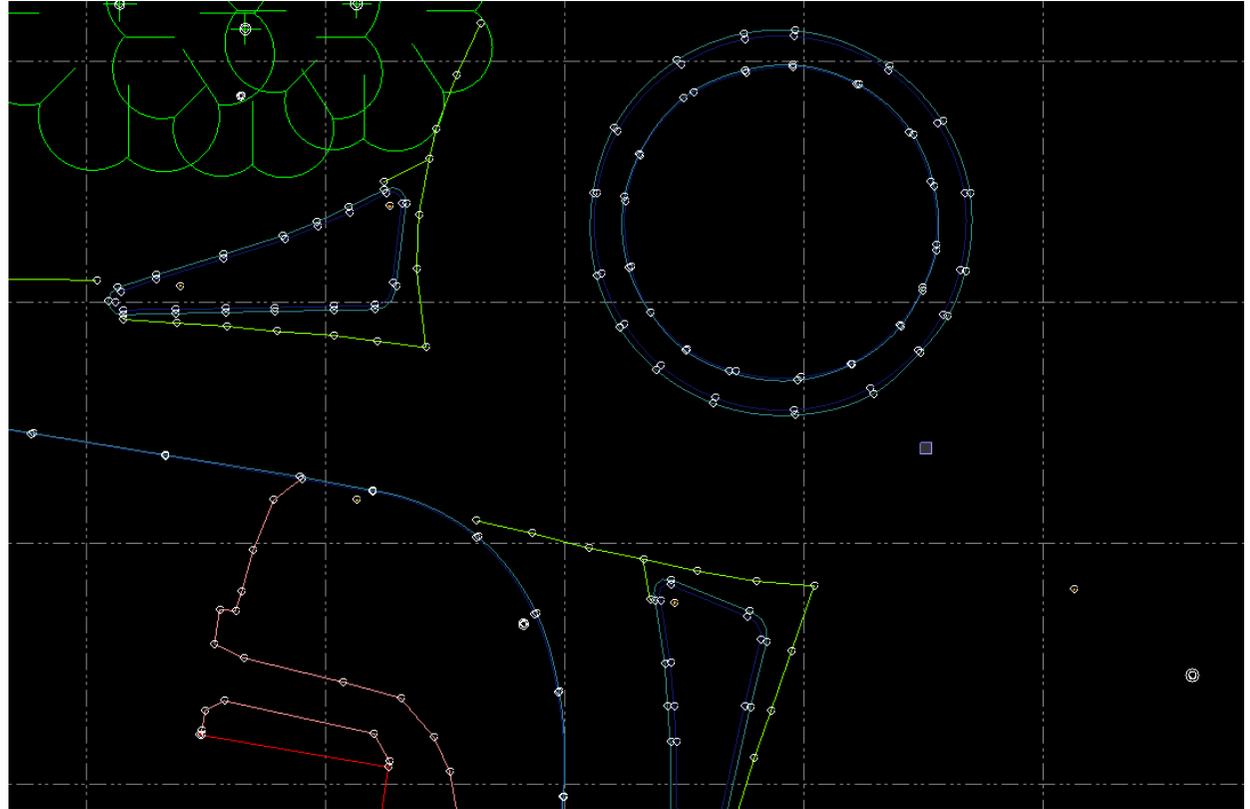

Control codes give extra line joining control in the field to creating arcs, shapes, start new line sequences, close figures, and join specific point. They are defined as seen below:

> XXXX # - space and then the control code is entered

So, a code would look like:
> EP02 1

Line Control Codes	
Name	Code
Line - Start	1
Smooth Curve - Start	10
Smooth Curve - End	11
Circle Edge - Start	12
Circle Centre - Start	13
Rectangle - Start	14
Horizontal Offset	15
Vertical Offset	16
Line - End	2
Joint to Point	3
No Join	4
Close Line	5
Tangential Arc - Start	6
Tangential Arc - End	7
Non-Tangential Arc - Start	8
Non-Tangential Arc - End	9

Other Items

EDITING:
We recommend not editing the FXL and providing UPG with any required edits, however you are able to do any required editing within TBC or the Feature Definition Manager.

ATTRIBUTES:
We have strived to ensure that attribute information is correct, however this may change moving forward with updates requiring an update to the FXL.

FINAL NOTE
UPG is committed to supporting the TMR code library and also enhancing functionality to assist with the use of this feature code library. Please contact us with any requests and suggestions that can be made to this library and also for any enhancements that could be made in TBC to improve the user experience when working with TMR, and we will try to accommodate them.
